🔧 Skills & Area of Expertise

🗣 Languages

Portuguese	Native
English	Fluent

Objective 🎯

To use skills learned both at university and working to achieve creative solutions for real world problems. To do so, I try to increase software quality as best as possible, taking advantage of team work and continuous learning.

Professional Profile 👤

Publicis Brasil

- Internship in front and back end web development using C# MVC.
- Among the responsibilities are the creation and maintenance of system for clients such as GM, Sanofi, Heineken and others.

Exchange Vancouver - Canada

- One year studying in Vancouver, Canada, in the University of British Columbia (UBC). Learning of the Canadian culture and the English language.
- I also did a complementary internship in a company in the mobile development segment.

Software Engineer Project at UBC

- Designed a GWT application that helps people to get information about voting locations in Vancouver. Functionalities involve getting places on maps, connect map points to a database and parse excel files.
- Used GitHub to organize workload and have a version control software.
- Developed following SCRUM method, achieving great results in a short period.

Nuvem Educativa

- Developed a responsive front-end design using Foundation library, achieving a well-maintainable and flexible structure for later additions.
- Worked with TortoiseSVN as a version control, what led me to a better understanding on how team work is managed in industry.

Paramitas Institute

- Built and maintained the company's main WordPress web-site.
- Built a Java program for a magnetic card reader, which provided me a good amount of experience on working with external and special driver as an input method.
